An introduction to our platform for

EU Fund/Corporate Services & Admin.

1. Why an EU presence for Funds?

New EU directives in the fund industry are making it easier for European investors to invest in EU domiciled investment vehicles. It offers them protection and a guarantee of transparency.

1. EU passport allows Investment Funds to raise funds all over Europe with only a single filing
2. Luxembourg, for example, has DTT's (Double Tax Treaties) with over 70 countries, lowering and/or deferring taxes

2. Why an EU presence for Corporations?

1. Tax favorable legislature allows companies to lower or defer taxes (own/manage your jet, real estate, yacht, ...)
2. Transfer pricing
3. IP domiciliation

2. Our value proposition

We established ourselves as a leading consultant in EU fund and EU corporate vehicle creation and administration. We work with the best service providers for turnkey solutions. We do our own permanent due diligence.

For investment funds, we will propose PPM's (Private Placement Memorandums), local lawyers and coordinate the approval with the local banking commission. We will organize a "beauty contest" amongst banks to be a custodian. Our partners have a record of building their practice based on TRANSPARENCY, ACCOUNTABILITY and GOOD PERFORMANCE. They all have world class references.

3. Our Network and its Capabilities

Although covering the EU, we obviously focus on partners/administrators in the most favorable tax jurisdictions, such as Luxembourg, Ireland and Malta. Not part of the EU, but geographically within the region, we also have a presence in Switzerland.

Our success as a specialist consulting firm is attributed to our ability to source **UNIQUE Corporate, Fund and Family Administrators** and bring them to the world, thanks to our own US and European presence. We can offer advice, implementation and long term maintenance for the most appropriate investment vehicles and SPV (Special Purpose Vehicle) structures to suit a customer's specific needs. We do advise investment managers willing to create financial vehicles and therefore have a deep knowledge on how they operate. We take pride in our exclusive team of experienced professionals, who are efficient, prudent and ethical in their dealings and who have played a major role in our success so far, providing innovative financial structuring solutions to our clients.

PERSONALIZED STRATEGY

Each of our customers has different situations and objectives and each of them is therefore directed towards different partners. They strive to satisfy our clients needs and offer turnkey solutions whenever possible.

INDEPENDENT ADVICE

We are not affiliated with any particular bank, administrator or law firm. Our interests are always in line with our clients objectives.
